DIDSBUY, ALBERTA, THURSDAY, SEPTEMBER 24, 1936

\$2.00 per Year. 5 Cents a Copy

Good Crowd Greets the "Chinook"

The "Chinook," new streamlined train of the C.P.R., pulled into the Didsbury station on time (8:46) on its exhibition run Monday morning, and there was a full platform of people who were waiting to look it over.

There was more or less disappointment expressed when it was found that the people were not permitted to inspect the interior of the train, as had been announced in the press that this would be allowed.

The train is comprised of a semi-streamlined locomotive, a mail and express car, a combination baggage and buffet car, and two coaches.

There are a number of features which differ from the conventional railway type. The coaches are of a completely new design and are about four and a half inches wider than the usual type. The seats are deeply cushioned with soft springs and are adjustable on their mountings. The ceiling of the car is painted cream and the lighting is from light-mounted under glass along the edge of the ceiling. The coaches are air-conditioned and dust-proof. The air-conditioning duct, which runs along the ceiling in the centre of the car, is the only break in the smooth ceiling-line.

The buffet car introduces a new feature to Alberta railway travel. Here sandwiches, pies, coffee, tea and light lunches will be served by a capable attendant. They may be eaten at the counter or taken to one of the tables in the car. The service is cafeteria style and the range of prices will be on the lunch counter rather than the dining car basis.

On the train's return from Edmonton at 8:26 in the evening there was also a large crowd at the station to greet it.

Address of Appreciation Rev. F. Vincett.

A very pleasing and touching incident at the close of the auction sale of the Rev. F. Vincett is worthy of note and interest to the readers of the Pioneer.

Mr. C. H. Adshead, on behalf of the business men and prominent farmers of the district, read an address of appreciation and esteem, accompanied by a presentation of a beautiful Sheaffer pen and pencil set further augmented by a gift of money.

Rev. Vincett, on behalf of himself and Mrs. Vincett, replied in a few words of heartfelt thanks expressing the desire that only good might terminate from the occasion that had arisen to cause them to make the decision to leave. Assuring their many friends and well-wishers that it will ever remain as a cherished memory, the recognition of a stand for Christian principles and freedom of thought, speech and liberty, which every loyal subject holds dear.

Below is a copy of the address:

Didsbury, Alta., Sept. 19, 1936
To Rev. and Mrs. Vincett

It is with regret that we learned of your decision to leave our community. You have commanded our respect by your quiet dignity and your leaving will be a deeply felt loss in the district.

You have been a loyal subject to His Majesty the King, a kind friend, a good neighbor and a man of courage.

In your work as a minister of the gospel, and pastor, you have been an ardent exponent of Christian teachings, both by word of mouth and by the humble dignity of your every day life.

In your recent stand we admire your high principled courage, honesty and impartiality, qualities which in these days of distorted values are being thrown into the discard.

We hope you will accept this small gift as a token of esteem and high regard.

Rev. and Mrs. F. Vincett spent the week end with their daughter Mrs. D. Schafer, in the Mayton district, and left by car for Vancouver on Wednesday.

Hail Loss Volume Up Over Year Ago

Hail losses are expected to be larger this season than last year, according to an executive of the Alberta hail insurance board. Figures as to the exact increase will not be available until the first of next month, but preliminary estimates show a distinct increase, due to the fact that hail fell in a larger area within the province than for some seasons past.

Greatest damage from hail occurred in the Didsbury-Olds districts, stretching as far east as Hanna. There were bad storms east of Wetaskiwin and another severe one south of Calgary, hitting DeWinton and swinging north to Langdon. In the northeast of the province the Manville area was hit twice, and just before the harvest hail again fell in the Drumheller district, but was reported as "spotty." A scattering of storms in other areas took their toll, to send the total loss soaring considerably above the figure recorded last season.

Successful School Fair.

The school fair held at the Mountain View Community Hall on Wednesday, September 16th, was a success from every angle. The number and quality of the exhibits showed care and skill on the part of the pupils. The exhibits of vegetables was especially good considering the damage done by the hail.

Mr. Crispo who judged the school work, commented very highly on the work of the pupils, and here credit is due the teachers as well as the pupils.

The exhibits of livestock and poultry were more numerous than in most previous years. Also the work in sewing and home cooking was worthy of comment. The youthful carpenters had been busy, judging from the number of woodwork exhibits shown.

Competition between the six schools was quite keen, but Jutland went home with most of the honors. The cup won in the relay race goes to Jutland, as well as the agricultural and educational diplomas.

The special prize of a box of chocolates, donated by Mr. H. W. Chambers, to the pupil having the highest number of points in school work was won by Dorothy Liesemer. The watch donated by Mr. W. A. McFarquhar for the pupil showing the best colt, went to Clifford Gibson of Gore School.

The school fair executive wish to express their thanks to all who helped make this event a success, and feel sure of their co-operation in future years.

Evangelical Church Notes.

Our Harvest Home service will be observed next Sunday morning, at 10:30 in Didsbury and at 3 p.m. at Lone Pine.

The Quarterly Official Board will meet on Friday evening, October 2 at 8 o'clock in the church parlors. Board members from Bethel and Lone Pine are urged to be present. Rev. W. W. Krueger will preside.

Golf Notes.

Handicaps for the next trophy competition are as follow:

Buhr	44
Brusso	19
Chambers	20
Dall	15
Fleury	23
Fisher	11
Friesen	26
Johnson	14
Julien	14
Kaufman	19
Kirby	15
McFarquhar	17
McGhee	13
McKenzie-Grieve	13
McLeod	31
Ranton	13
Reiber	26
Watkin	25
Wordie	17

Bert Fisher was winner of the last trophy competition and has kindly put it up for competition again.

Will Lecture on Vimy Pilgrimage.

The meeting of the Canadian Legion which will be held this Saturday evening will be of special interest to all returned men.

Comrade Arthur Foulds, of Delburne, will give a lecture on his trip to Vimy. Mr. Foulds has a large number of pictures to exhibit and his talk is sure to be interesting.

Locate Oil Showing at Hunter Valley

Recent outstanding oil news was the announcement made last week by the Hunter Valley Oil Company Ltd. that oil and gas showings were being obtained at its McLaren No. 1 Well on the Hunter Valley structure west of Didsbury.

While the showings are not large they are considered most encouraging as an indication of the potential productivity of the structure. The showings are believed to be coming from the lower Kootenay formation. A strike would open up a great new structure for development in Alberta.

Local motorists report that the police are making a check up for licenses, headlights, etc. on the highway this week.

Calf Club Chooses Team

There was a good attendance at a meeting of the Didsbury Calf Club in the public school Monday night. Douglas Burns occupied the chair.

The principal object of the meeting was to choose a team to compete in the judging competition for the Alberta championship. Douglas Burns and Paul Hansen were chosen to represent the club and they will compete against Olds in the first contest.

Mr. Parkinson of Olds, director of the calf club, was present and gave a talk on club matters. He said that it was proposed to organize a Swine Club at Didsbury, but it would be necessary to have a membership of at least twenty before a club could be organized.

At the close of the meeting games were enjoyed and a supper of hot dogs and coffee was served.

It is intended to hold a number of meetings during the winter to keep up interest in the club.

Jumper Goes to U.S.A.

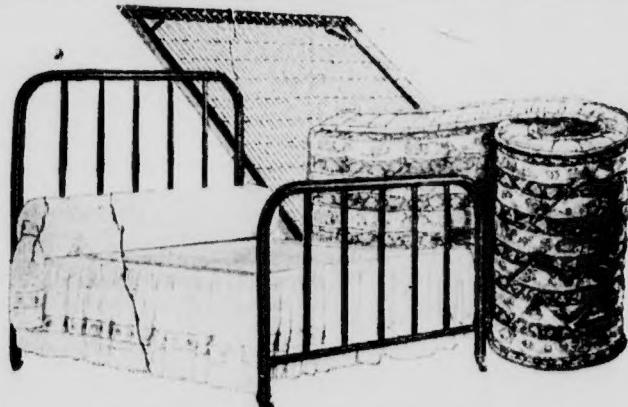

W. J. Fulkerth informs us that he has sold "Peggy," champion performance jumper of Western Canada. "Peggy's" new owner is Mrs. Frank Blake, of Denver, Colo. Joe also reports shipping two 3-year-old chestnut saddle geldings to Miss French, of Vernon, B.C.

The Need For Flexible Loans

More elasticity is needed in mortgage loan agreements covering security in Western Canada in future than has been provided for in the past.

In future agreements some cognizance should be taken of the possibility of the intervention of Providence in the affairs and operations of the mortgagor resulting in complete or partial inability to meet maturing annual payments of principal and interest due to no fault of his own.

Experiences of the past few years of general economic and agricultural depression have demonstrated that the terms under which loans have been made in the past have been based on the false premise that the farmer is in receipt of an assured and steady income, such as, at least in theory, is enjoyed by the salaried man.

Such agreements provide for the payment on a specified date each year of a portion of principal and one year's interest on the loan, without any provision for postponement of either principal or interest in the event of crop failure which may ensue from any one of a number of causes over which the mortgagor has no control whatsoever.

The conditions under which agriculture has labored in Western Canada during the past five or six years, resulting in the piling up of mortgage indebtedness and now necessitating debt adjustment on a wide scale, have amply demonstrated the futility of agreements which make no provision for a measure of relief in periods of total or partial crop failure.

There is no doubt that much of the work and expense of debt adjustment now in progress could have been avoided had agreements, under which these debts have pyramidized, even to the extent in some cases of wiping out the mortgagor's equity, been drafted when the original loans were made, to provide for automatic reduction in the amount of repayments in years in which, because of the operation of natural forces, the mortgagor had little or no income and for an increase in payments in years of bounty, when much of the indebtedness would have been repaid.

Not only would endless negotiations with loan companies and the work of debt adjustment tribunals have been materially lessened, but the debtor would have been saved years of mental torture and harassing anxiety as he watched a juggernaut of accumulating interest threatening to crush him and pictured the arrival of the day when he and his would be dispossessed of all they ever owned.

A form of agreement that would eliminate this dread which must necessarily haunt the days and nights of the honest debtor who does his best to meet his obligations and is only defeated because of circumstances over which he has no control, would be a godsend to all who have occasion to secure loans in the future.

It should be possible to draw up an agreement that will provide for repayment of principal sums in accordance with the ability of the mortgagor to pay based on actual returns from honest effort and yet, at the same time, protect the lender from loss due to human incapacity or the machinations of dishonesty.

It is interesting to note that agreements incorporating the principle of paying more in times of plenty and less in times of dearth have been adopted and put into effect with apparent success in Australia, where in certain sections of the country the sheep ranchers are subjected to severe drought ravages to the extent at times of wiping out whole flocks. In that country the same principle has been made to apply also to short term credits supplied by the banks.

If such a policy can be worked out successfully in Australia there appears to be no reason why it should not operate equally well in Western Canada.

It is to be hoped that some arrangement for greater elasticity in future loan terms can be made by members of debt adjustment tribunals who are in frequent negotiation with the loan companies at the present time.

That the necessity for something of the kind exists was referred to recently in an address by S. P. Gorsch, chairman of the Saskatchewan municipal debt adjustment organization, when he said: "I find there has been a rigidity in our system of making loans to farmers that has not sufficiently taken into consideration the wide fluctuations in revenue to the farmer between years of plenty and years of scarcity. Provision should be made for greater flexibility."

The fact that at least some authorities have come to this conclusion strikes a hopeful note that something more commensurate with Western conditions will be arranged for in the future.

Special Prize

A special prize of \$25 will be awarded for the best finished Hereford steer at the Saskatoon and Regina spring fairs in 1937.

Highway tolls were once paid with cash, but now with blood.

How Easter Date Is Set

The present rule for determining the date of Easter was adopted by the Council of Christian Churches in 325 A.D. This rule says that Easter shall be on the first Sunday following the Paschal full moon, on or soon after March 21.

Liquid Air As Fuel

Newest Energy For Motors Being Tested In Japan

Liquid air serves as fuel for one of the strangest motors ever built, which now is operating in a Japanese laboratory. Should it fulfill the hopes of its inventor, it may bring about a revolution in motive power for vehicles of the land, sea and air. In contrast with the fiery temperatures of a conventional internal-combustion engine, which it somewhat resembles, the new motor operates at temperatures from 250 to 350 degrees below zero. Its small fuel tank holds ordinary air that has been chilled until it is transformed from a gas into a liquid like water. The difference in temperature between this extraordinary fuel and the surrounding atmosphere provides the energy to run the motor. From the fuel tank, the liquid air passes to a chamber where it is allowed to absorb heat from the exterior air. In doing so, it turns to vapor, much as water turns to steam when heated in a boiler. The pressure of the expanding air drives pistons in a pair of cylinders. Through an elaborate system of auxiliary apparatus, virtually all the energy contained in the liquid air is reported to be recovered. Because of its efficiency and small bulk of fuel required the inventor foresees eventual application of his motor in automobiles, trains, ships, and especially in airplanes. The small bulk of fuel required would also be an important advantage in aircraft. — Popular Science.

WAKE UP YOUR LIVER BILE

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the body and floats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sick and weak.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get them two pounds of bile flowing freely. They make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Centipede To Blame

Caused Breakdown At Electric Power Station In India

Peshawar City, on the North-West Frontier, India, was thrown into complete darkness by a centipede. For three successive evenings the city lights failed. On each occasion a breakdown occurred at the electric power station, but experts could not detect the cause. All their investigations—even to a rapid inspection of underground cables—failed to explain the mystery. Then on the fourth night, a linesman found a centipede on the wires which carry the electric current to the city. A number of its legs were singed. This was taken as sufficient evidence of its previous expeditions.

No Wonder It Hurts

The tail of the cat is part of the backbone, or spine, which is made up of a number of little knots of bones joined together, just like our spines; and pussy's spine also is joined to her brain. You will understand now why puss cannot bear to have her tail pulled and why she growls and scratches when the baby drags at it. No wonder for it affects her brain and half maddens her for a minute. —Our Dumb Animals.

Finds Thriving City

British Government Official Sees The Settlement While Flying

The lost city of Yong Peng, inhabited by 5,000 Chinese and situated in the midst of the Malayan jungle, was found by a British government official while flying over the district.

The official, who was employed in the Land Office of the native Malay state of Johore, saw a large settlement in the heart of the jungle, which he did not recognize. Next day he drove to it, and to his amazement discovered that it was the lost city of Yong Peng.

The government was unaware of the existence of the town, although it has been a thriving agricultural centre for nearly ten years.

The inhabitants, who are Chinese, work as rubber planters on an area of more than 10,000 acres. They have built the town as their headquarters, and provided it with all the amenities of a native civilization.

SELECTED RECIPES

DATE SHORTBREAD

(Mixture 1)

1 package dates (stoned)
1 cup boiling water
1 cup brown sugar
Method: Boil together until soft. When cool, add 1 teaspoon vinegar or lemon juice.

(Mixture 2)

1 cup shortening
3 cups Purity Rolled Oats
2 cups Purity Flour
1 teaspoon salt
1 teaspoon soda
Method: Sift flour with salt and soda; add Purity Oats and cut in shortening.

Divide Mixture 2 into equal parts. Place half of it in oiled baking pan. Spread Mixture 1 over this, and then spread remainder of Mixture 2 over date layer in sandwich-like fashion. Bake in slow oven of 300 degrees for 40 minutes.

Interested In Alaska

Don Skuse has returned to Juneau, Alaska, and declared he was stopped by every traffic cop on Broadway and Fifth Avenue, New York, but not for infractions. The policemen spotted his Alaska license plates and wanted to learn something about the territory.

Japanese scientists are displeased because Russia would permit only two of them to enter the country to view the recent eclipse.

Forgotten Eskimo People

Government Scientist Trying To Find Traces Of Early Civilization

A new attempt to find traces of a forgotten Eskimo civilization in the Eastern Arctic will be made by a Canadian government scientist who has sailed for the Arctic aboard the Hudson Bay's sturdy supply ship, Nascole.

Discovery of bone and ivory implements bearing no resemblance to those used by present-day Eskimos has led scientists to believe that the Eastern Arctic once was inhabited by a strange race, now extinct.

Douglas Leechman, a National Museum anthropologist, will spend several weeks exploring old village sites on the Burto Islands, on the eastern tip of the Ungava Peninsula, in an effort to find some clue to the date and origin of the ancient race.

Horns Must Be Approved

Soft Tone Essential For Cars In Buenos Aires

The city of Buenos Aires, according to a report, will refuse to license automobiles unless the sound of their horns is approved as mellow and soothing. The regulation provided that "all motor vehicles should be provided with horns of a single soft tone, to be determined by the executive department. The use of 'Klaxon' sirens, loud-sounding sharp and double or treble-tone horns is strictly prohibited."

The only safe rule is to quit driving for a spell when drowsiness begins to steal away one's alert attention to the full and efficient control of the car.

Burns 90% air—only 45¢ fuel.

Costs less than 1¢ an hour to operate.

Uses a 10¢ mantle.

No glass chimneys or shades to break or clean.

Safe—fuel confined in sturdy metal font.

Export Wheat Markets Will Be Dominated By Canada Until December

Canada will dominate the export wheat market from now until December stated a summary issued by the Dominion bureau of statistics based on returns for the end of the crop year July 31. The only competition of importance facing Canada until December will be from Danube countries.

From December until the end of the present crop year (July 31, 1937) "export competition will be conditioned upon the yields from the crops now planted. Both countries (Australia and Argentine) have acreage planted in excess of 1935 and weather conditions have been favorable to date."

The bureau summarized the wheat situation as follows:

1—World net imports of wheat and wheat flour for 1935-36 are placed at 498,500,000 bushels, the lowest level in recent years. Production estimates for 1936 in the United Kingdom and Europe are 53,000,000 bushels lower than in 1935. Wet harvesting conditions will probably reduce further the final estimates of production. A moderate increase in world net imports may, therefore, be anticipated.

2—Canada will dominate the export market from now until December, facing competition of importance only from the Danube countries. Assuming normal yields in the Argentine and Australia in the light of present crop conditions, Canada will face much greater competition from these countries in the balance of the crop year, than for the same months in 1935-36.

3—The United States is again definitely out of the export market, and it is now generally conceded that Russia will have no export surplus this year. No Russian offers have been made to date on the improved C.I.F. market.

4—Prospects for exports to the Orient have remained unchanged during the past month. The Japanese crop is placed at 46,223,000 bushels, 2,500,000 bushels less than last year. The trade dispute between Japan and Australia will probably yield Canada a larger market than in the past year.

5—The Canadian carryover of 95,500,000 bushels less than in 1935, plus a smaller 1936 crop, will leave this country with materially reduced export supplies, compared with the preceding crop year. Canadian exports will reach a smaller total in the current year than in 1935-36, due more to the decreased domestic supply, than to the lack of effective import demand. It is likely that the carryover will be further reduced, however.

The Tragedy Of Accidents

Large Number Of Them Could Easily Be Prevented

According to a survey by a leading magazine, fatal accidents are more frequent on the farm than in most city occupations. One reason for this is that factories have regular inspection of machines to forestall accidents. The elimination of dangers in farming is far more of a job because of their wide variety and their deceptive commonplaceness. There are three major and frequent causes of farm accidents: poor repair of farm buildings, careless handling of livestock and improper use of farm equipment. The sad part about all these accidents, is that they are unnecessary. They could easily be prevented.

The little things cause the most tragedy—loose floorboards, broken stair treads, defective stepladders, loose matches, improperly marked poisons, improper use of kerosene and gasoline, not keeping a close eye on the bull in the pasture lot, and so forth.

The remains of the "ghost town" of Frisco, Utah, which in 1875 had a population of 5,000 and produced \$100,000,000 in silver, now stands vacant.

A novel clock in a South American city is in the form of a searchlight. The clock, in revolving, falls on a different landmark every hour.

Wild Ducks Need Protection

Drought Conditions Have Destroyed Many Breeding Grounds

Breeding conditions for wild ducks in southern Saskatchewan are described alternately as grave and serious in a report filed by J. Dewey Soper, chief federal migratory bird officer, prairie provinces, for the department of the interior, to Hon. T. A. Crerar, minister.

Mr. Soper, a resident of Winnipeg, travelled more than 3,600 miles to make the survey, visiting the heart of the former No. 1 duck breeding area of North America.

The report states that conditions are very grave over extensive sections of southern Saskatchewan. Some species of ducks such as canvasback, redheads, green-winged teal, gadwall and ruddy duck were met with only at rare intervals. Mallards were scarce. Canvasback and redheads are at a dangerously low ebb. Green-winged teal and ruddy duck are so reduced in numbers that they are urgently in need of more protection.

Taken as a whole, conditions are very serious, asserts Mr. Soper's report. This is brought out in the contrast of conditions at Crane lake as they were 30 years ago and as they are at present. A. C. Bent, foremost American ornithologist, writing in 1905 in his "Life Histories of North American Birds," described its shores as forming a verdant slough of tall waving bulrushes. He says that this was the gem of all that wonderful bird country, the centre of abundance of breeding wildfowl, and here he found 25 species of water birds nesting in an area less than a mile square.

Mr. Soper's report describes the situation this year at Crane lake in the following ten words: "Completely dry, presenting a bare, whitened desert floor. No waterfowl."

Mr. Soper's inspection commenced June 18 and took him through the heart of the prairie wild duck breeding grounds of North America. During the first part of the trip conditions appeared better than in 1935.

However, lack of rainfall and hot weather rapidly dried up many sloughs except in a few restricted areas where the cloud-burst type of rain-storm in 1935 so raised the water-table that sloughs have held up during the present season. In these favored localities there is an improvement in local occurrence and distribution of ducks.

The seriousness of the situation, the report declares, is not confined to Saskatchewan, and as the ducks tend to spread out fanwise in migration, the effect of the lessened numbers will be felt by shooters over a large portion of the country.

New Type Greenhouse

Has Few Windows And May Cut Cost Of Heating

Greenhouses constructed with so few windows that electric lights are needed in them, and gardens enclosed in canopies of muslin, are two experiments proceeding at the Ontario Agricultural College which may help to change important branches of Ontario agriculture.

A plan to construct greenhouses with a minimum of windows, instead of entirely of glass, is an attempt to cut down the cost of heating the greenhouses.

It has been discovered that sunshine in winter days is mostly available near noon, so glass is put into the greenhouses only at angles which will catch the sun's rays in the middle of the day. The remainder of the greenhouse is heavily insulated to prevent the quick radiation of heat provided by glass.

Side by side in the O.A.C. fields are two gardens containing the same vegetables, one enclosed by muslin, the other open. Both have been given the same amount of water this summer. Yet the enclosed garden is far in advance of the open one.

The muslin protects the crops from the sweep of hot winds, keeps the air more humid, and maintains lower temperatures about the growing plants.

Will Keep Fewer Horses

Motor Transport Has Its Effect On Royal Arrangements

All the King's horses, or nearly all, are being moved from the Royal Mews at Windsor to Buckingham Palace.

Although the change will be regretted on sentimental grounds it seems inevitable. Gone are the days, seemingly forever, when European monarchs were drawn in full pomp from Windsor Station to the Castle, a distance of but a few hundred yards.

In truth the arrangement will have little effect upon the personnel attached to Windsor Castle. For some years past the famous Windsor Greys have been the only horses kept at Windsor, and many of their former custodians at the castle have already been retired on pension. The royal landaus, used for the driving during Ascot week, will remain at Windsor.

The Mews at Buckingham Palace, where the horses from Windsor will now be kept, were built by George IV.

The development of motor transport has had its effect on the royal arrangements, and King Edward has decided it is not necessary to keep more animals than are needed for state occasions in the Royal Mews in London, with the exception of a few for private riding.

The Windsor Greys were introduced by George V. and have been used on innumerable state occasions. They will be seen again next year when the coronation procession takes place.

Reindeer Experiment

Herd Brought From Alaska Thriving On Mackenzie Delta

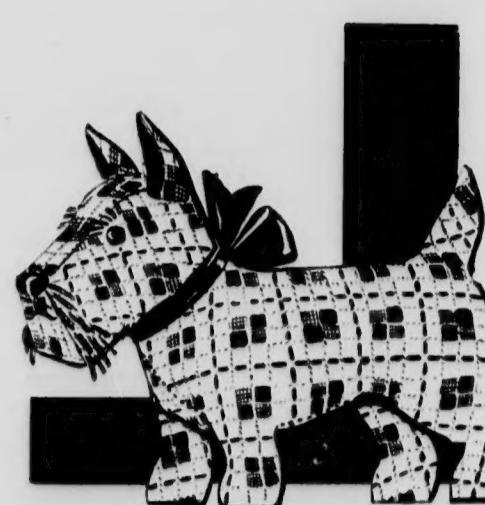

A milestone was reached in the experiment the Dominion government is making to provide reindeer for the Eskimo when the report reached Hon. T. A. Crerar, minister of mines and natural resources, that the second year the herd had been on the Mackenzie delta was successful. The animals were in excellent condition and the fawning season which took place in April, May and June, resulted in the addition of 936 fawns to the herd.

The deer passed through the corals, were counted and the fawns marked. As soon as completed, Dr. J. A. Urquhart, departmental agent and medical officer at Aklavik on the shores of the Arctic ocean, sent a message describing the condition of the reindeer. It showed that the herd brought originally from Alaska and taken kindly to its new reserve. The herd now numbers 3,750 and some 500 of matured steers and aged females will be slaughtered to provide food and clothing. The remainder will be moved to the winter quarters at the south end of the reserve. The original herd reaching Aklavik numbered 2,370.

Plans for the extension of Paignton harbor, the only one in England with a girl harbor master, are being considered.

Scottie Pup Will Liven Things Up!

Household Arts by Alice Brooks

PATTERN 5006

Hoot, mon—here's a wee Scottie that every laddie or lassie would yearn to cuddle! How the youngsters will love and admire him for his gay plaid coat, yarn whiskers and soft figure. He's easily and quickly made, too—and stitched in bright, inexpensive cotton fabric, he's a real "scotch" treat! Why not send for the simple pattern today, and make Scottie for a jolly, appropriate gift? In pattern 5006 you will find a pattern for the dog; complete directions for making it, and material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Britain Has Used Same Crown At All Coronations For Over Eight Centuries

For eight and a half centuries our not save him, and after he was killed Kings have been crowned with the it was placed on the head of Henry crown of St. Edward the Confessor, of Richmond (Henry VII.) by the and as late as the coronation of King famous ancestor of the present Earl James II., the new monarch swore to grant and keep the "laws, customs and franchises" granted by "the Glorious King St. Edward."

So deeply did the mysterious personality of the last ruler of the Saxon royal line impress itself upon the nation that St. Edward's crown is to this day the official crown of England, writes J. G. Noppen in the Daily Sketch.

The monks of Westminster claimed that the pious Edward had bequeathed his regalia to their care in order that future Kings should be crowned with it in the Abbey church, and when William the Conqueror stood at his coronation before the Confessor's tomb it was certainly the reputed crown of Edward that was placed upon his brow.

After the ceremony this crown was promptly returned to the custody of the monks, and so the Abbey church became our coronation church.

There were, however, many other crowns in existence, and, indeed, our early kings were accustomed to carry a set of regalia about with them.

The great coronation crown itself was uncomfortably heavy and could not be worn during a long public ceremony. Even when the King was crowned it was supported on his head, and the honor of assisting in this task belonged in part to the Earl Marshal.

The crown that was broken up and sold by order of Cromwell's Parliament in 1649 was described as "of massey gold weighing 7 lbs. 6 oz." and enriched with rubies, sapphires, emeralds, diamonds and pearls. It was valued at £1,100.

When Charles II. was restored to the throne, the bill of Sir Robert Vyner, the famous goldsmith who supplied the new regalia, came to £32,000. This included two crowns.

The state crowns were often remade for the various kings, and a special one was wrought for King John.

It is, however, a mistake to believe that John lost it in the sands of the Walsh, for it was still in existence in the year 1290.

It was then found in the possession of a dishonest court official named Adam Stretton, together with £30,000 worth of other treasure which he had appropriated!

King Henry V. wore his crown while actually fighting at the battle of Agincourt; and it is said to have saved his life when he was in combat with the Duke of Alencon.

A blow from the Duke's sword chipped a piece off his crown, but did not get through to his head.

Richard III. wore his crown at the battle of Bosworth Field, but it did

Crowns have been made in different forms throughout the ages, and not all have had the now familiar arches surmounting them.

Ancient effigies and pictures of kings often show a crown in the form of a circular band of gold with crosses and lily flowers rising from the edge.

This was perhaps the form of crown which kings usually wore on appearance in public, and the carvers and painters would copy it in their work.

The crown of St. Edward may always have been arched, and certainly that with which Henry IV. was crowned was of this form. It would, however, only be seen at coronations, and not so well known.

St. Edward's crown, which is shown at the Tower of London, was made for Charles II. by Sir Robert Vyner, and the goldsmith was ordered to make it "after the old pattern", of which there would then be some record of memory.

After the coronation the King goes to the Chapel of St. Edward behind the high altar of the Abbey and there exchanges the crown of St. Edward for the Imperial State Crown, and his coronation robes for state dress.

A new imperial crown was made for the coronation of George IV. and another for that of Queen Victoria. It was Queen Victoria's crown that was placed above the coffin of George V. for the funeral procession.

Whatever arrangements may be made with regard to the regalia of King Edward VIII., he will, traditionally assume the crown of St. Edward.

Binder Twine Given Good Measure

Very Few Complaints About The Quality In Recent Years

There has been little complaint as to the quality of binder twine sold in Canada in recent years. The law requires that each ball of binder twine sold, whether Canadian made or imported, bears a label showing the number of feet per pound in the ball. These statements as to length, for example 500, 550, 600 or 650 feet to the pound, are checked by inspectors of the Seed Branch of the Dominion Department of Agriculture.

A certain tolerance is allowed under the Act in consideration of variations which naturally must occur. However, of the three hundred samples or more tested annually, more than half have shown a greater length to the pound than the label called for. In samples which did not meet the guarantee, the deficiencies in length per pound were inconsiderable, and only in occasional cases did the deficiency exceed the limit allowed. Since 1930, the proportion of samples found to have shortages has not amounted to three per cent. of the total number of samples tested, the proportion in 1935 being less than half of one per cent.

Good For Business

Dog In English Railway Station Boosted Chocolate Sales

About the last place where one expects to find an animal story is in the page of a company report, but one appeared in such a report not long ago.

At a railway station near London one chocolate machine, for some unaccountable reason, was doing far more business than any of the others. The Automatic Company was gratified but puzzled, and sent down a representative to find out the reason.

The stationmaster's dog, an intelligent Yorkshire terrier, provided him with the solution.

One day the dog had been given a piece of chocolate out of the machine, and had since guarded it carefully, inviting each passer-by to put a penny in the slot, and afterwards share the delicacy with him. His enthusiasm and tail-wagging were generally rewarded.

**Interest Reduced
On School Lands**

In an interview granted to the press by Hon. C. C. Ross, minister of lands and mines, he mentioned the problems confronting the purchasers of school lands, many of whom bought at a time when financial returns from farm produce were very much in excess of today's prices.

The minister stated that since taking charge of the department he has been giving considerable thought to the situation, and having decided upon the necessity of granting some specific form of relief, action has been taken by proclamation to reduce the interest on the undue instalments of the contracts from 6 per cent to 4 per cent, and interest on arrears from 7 per cent to 5 per cent.

The minister stated that the most outstanding part of the proclamation deals with the assistance that will be given to the purchasers who bought at the peak of prices and who find that through depletion of their resources they are unable to comply with the terms of the contract. Such purchasers will have the right to make application to the Registrar of the Farmers' Creditors Arrangement Act for a compromise, and the minister explained that the department would write each contract holder as to how the purchaser should proceed if he wishes to take advantage of the legislation.

Sales that have been cancelled since September 30, 1930, may be reinstated if the land is available, and such settlers will have the same privilege to bring their cases before the registrar for a compromise or reduction in the terms of the contracts.

The minister pointed out that this action is consistent with the stand taken by the government at the recent session in dealing with the reduction and settlement of outstanding debts. Those settlers wishing to obtain advantage of these concessions would, he stated, be well advised to take immediate action so that they may secure the full benefit offered by these amendments.

Doings of Our Neighbors

AT OLDS: Thieves entered the C & B Motors last Friday night and stole a new 1936 Standard Chevrolet Sedan, one pair of dealer's license plates and fifty-two gallons of gas. Entrance was gained by the large sliding door on the north side of the building, and after putting the license plates on the car the thieves apparently left by the same way. Not satisfied with taking a car, they broke the lock on one of the gasoline tanks and procured the gas.

AT INNISFAIL: A safe in the office of the Innisfail Flour Mill was completely wrecked at 3:20 Tuesday morning of last week by a burglar who forced an entry into the building. The door was blown completely off the safe, several holes punctured in the wall of the office by flying metal, and all panes in the office window blown out. The only loss was from damage caused by the explosion, as there was no cash in the strong box.

Items of Interest

Registrations of individuals at Edmonton for basic dividend purposes under the government's Social Credit plan numbered 21,000 or 22,000, it was stated Friday by W. Bullock, who is in charge of the Edmonton staff.

Suffering severe burns about the face and hands, John Murray was brought to the hospital at Innisfail last Thursday, following a gasoline explosion in a threshing outfit on a farm west of Bowden. The injured man was feeding gasoline to the threshing machine and some of the liquid was believed to have come in contact with the heated parts of the machine, causing an explosion. Ben Whitmore, owner of the farm, was also burned while extinguishing the fire. The separator was almost a complete loss.

Protection under the Reduction and Settlement of Debts Act was refused a farmer-debtor by Mr Justice W. C. Ives, in Alberta Supreme Court chambers last Thursday, on grounds that although the debt was contracted in 1919, a new agreement made in 1933 placed it beyond the scope of the act in regard to reduction of the principal.

It became known Saturday that the Nordon Corporation and the Imperial Oil Company have entered a mutual agreement for the development of some 230,000 acres of potential oil lands lying between Lethbridge and the Montana border. Surveys are being made preliminary to an active development program, it is stated.

Pete Knight, noted Crossfield cow puncher has been proclaimed bucking champion of the world, but two Western States riders share the title of king of the 1936 Pendleton round up.

Eight persons were injured on Sunday when a Canadian Pacific Kettle Valley line westbound express crashed from the rails on a curve at Corra Linn, eleven miles west of Nelson, B.C. The locomotive plunged down a low embankment beside the Corra Linn power plant. The front of the engine was crushed in and the superintendent's coach was lying on its side beside the twisted rails. The fireman and engineer were thrown clear of the cab as the tender, first to leave the rails, apparently dragged the locomotive down the embankment. Cause of the derailment was not immediately ascertained.

Burnside Notes.

Don't Forget the Dance at Lone Pine Hall this Friday evening, September 25. Rocky Mt. Rangers Orchestra.

Mrs. Joe Clark spent Tuesday afternoon with Mrs. Chas. Mardon.

Mr. and Mrs. Bruce Sheils spent the latter part of the week in Calgary.

Fred Metz spent Sunday at his home here.

Fred Doll was a Sunday afternoon visitor with Bob Eckel.

Mrs. Joe Clark spent Monday afternoon with Mrs. Ed Anderson.

Earl Dedels was a visitor on Sunday at the Scharkler home near Sunnyslope.

Mr. and Mrs. Sam Elliott spent Friday with Mr. and Mrs. O. Bittner.

Mr. and Mrs. Chris Ebret, Mr. and Mrs. Otto Bittner and Mr. Wm. Lyons were Saturday afternoon visitors to Three Hills.

Mrs. Wall who has been assisting Mrs. Wm. McCulloch for the summer, left on Saturday night for Didsbury where she has taken a position at the Bright Spot.

Mr. and Mrs. Todd, Mr. and Mrs. Joe Clark and Mr. and Mrs. Otto Bittner and baby daughter were Sunday dinner guests with Mr. Albert Spragg.

Mr. and Mrs. Charlie Welch of Calgary were Sunday visitors with Mr. and Mrs. Fred Thompson. Mr. Ralph Long was also a weekend visitor with Mr. and Mrs. Thompson.

Mrs. Albert Arlendson was hostess at her home Thursday afternoon last at a nicely arranged shower in honor of Mrs. T. K. Pratt (nee Gertie Miller). The guest-of-honor received many beautiful and useful gifts. Those present were Mrs. E. K. Pratt, Mrs. T. K. Pratt, Mrs. John Miller, Mrs. Todd, Mrs. McCord, Mrs. O. Bittner, Mrs. C. Ehret, Mrs. B. Woods, Mrs. J. Clark, Mrs. N. Eckel and Miss Ruth Thoman.

Melvin Notes.

A number of Mrs. August Krebs' friends gave her a birthday surprise by calling on her Saturday evening.

Mrs. G. Carlson spent the week with her daughter, Mrs. P. Daniels, of Calgary.

Mr. and Mrs. Wm. Stubbs had as their guest last week Mr. Stubbs' father from Victoria, B.C.

Mr. and Mrs. Hugh Morton were Sunday visitors with Mr. and Mrs. Roy McNaughton.

Mr. Wm. Bellamy, of Salmon Arm, B.C. spent last week at the Peter Johnston home and called on other old friends in the district.

Miss Dorothy Youngs of Butts School, Balzac, accompanied by Miss Mildred Brown of Crossfield School, spent the weekend at her home here.

The herd of cattle that are being driven by Jerry Gibson and Hector Lamont from the foothills to the east country for the winter, stopped overnight at Peter Johnston's.

We all wish to see Miss Sarah Landen improve in health much faster. She is at present back in Calgary after spending a few weeks at home.

Mr. and Mrs. George Summers and Mr. and Mrs. Clarence Bolton and Clifford, returned to Calgary on Sunday after spending a couple of weeks with Mr. and Mrs. Wm. Summers and Sid.

We are pleased to report that Doug Landen's hand, from which he had the misfortune to lose his first finger, is improving rapidly. John Kershaw who also lost the first finger of his hand lately, reports that it is healing nicely. These accidents were very unfortunate for both men.

BIRTHS
at Didsbury General Hospital

September 20, to Mr. and Mrs. Bob McGafflin, a daughter, Jacqueline Rose.

Let's Try It!

You've had trouble with your neighbour;

Quite some fracas—hard to quell it;

Hasten not to make it public—

Let the other fellow tell it.

Truer far will ring his version,

(He can tell it best you know.)

Be a chivalrous old topper;

Give the other bird a show.

Comes a whispered local scandal;

Gee it's rich, whew! can't you smell it?

Don't attempt to do it justice—

Let the other woman tell it.

Ah! what rapture fills her being!

Note the joy-transfigured face

As, exulting, she belittles

That poor soul just fell from grace.

Let the other fellow tell it—

That dark tale you doubt is true;

Nor begrudge to him the honor—

Let him tell that story too.

With all gossips on the rampage,

Best for you to hide away

And lock your talker in its stable—

That's the place for it today.

L J. W.

"Chinook" to Cut Almost Hour Off Regular Schedule

Operating time between Calgary and Edmonton will be reduced 55 minutes by the new Canadian Pacific streamline train which is to go into regular service, starting Sunday, September 27.

The train will leave Edmonton in the mornings and return north in the evenings. The trip between cities will require 5 hours 15 minutes as compared with the fastest time at present of 6 hours 10 minutes.

On regular service the train will leave Edmonton weekday mornings at 8 o'clock, arriving in Didsbury at 11:56 and Calgary at 1:15. It will leave Calgary weekday afternoons at 5 o'clock, arriving in Didsbury at 6:17 p.m. and Edmonton at 10:15. Sundays it will leave Edmonton at 10 o'clock in the morning, returning north from Calgary at 5:25 in the afternoon.

Population of Calgary Is 83,304.

Calgary's population, according to this year's census, is 83,304. This is a decline of 457 compared with the census of 1931, when the figure was 83,761. These figures were announced by the census bureau last Thursday afternoon.

Edmonton's 1936 population was placed by the Dominion statistician at 85,676, increasing from 78,197 in 1931.

An International Visitor

A Salvation Army officer of distinction will be visiting Didsbury this Thursday evening in the person of Major Mrs. Watkins, of London, England.

The Major has had a varied and interesting career. She served in editorial work for seven years in a most efficient manner. For twenty years, with her husband, she served in real missionary work in India. Amidst disease, death and poverty she toiled for the uplifting of the people. None were too loathsome for her affection and sympathy of a practical nature. In more recent years she served in West Africa, which has been formerly known as "the white man's grave." Of recent years the British government has been filling in the mosquito-infested swamps with sand, thus to a great extent eliminating the danger to white people of malaria. A most careful inspection by health authorities of every home periodically for mosquito larvae, with severe penalties for infractions of health instructions, has made it comparatively safe for people of other countries.

The Major has spoken to important gatherings in Edmonton, where she has been visiting her parents, and has addressed by special invitation many gatherings of missionary societies of the various churches. She is a forceful speaker, informative and interesting, and will speak in the Evangelical Church at 8 o'clock tonight (Thursday).

Elevator Competition

The business of handling Western grain is not only the most highly regulated but also the most competitive business in Canada.

All country elevators, whether Line elevators or Pool, compete for business. Competition is as keen amongst Line elevators as it is between Line and Pool elevators. The service given by elevator companies is honest and efficient, as it must necessarily be.

The Alberta Pool advertisements refer to their competitors as a "family compact." There is not and never has been any "family compact" among grain companies any more than there is between Line and Pool elevators.

It is the habit of the Pools in their advertising for competitive business to claim credit for every improvement in agricultural conditions and to blame their competitors for the burdens that remain, whether they arise from world conditions, national conditions or geographical conditions, for which the Line companies are no more responsible than the Pools. Their claim is untrue and unfair.

The Line elevators are as keenly interested as any other organization in a good price for the farmer, in his prosperity and in the improvement of the external and internal conditions that affect his welfare.

THE GOODYEAR STUDDED TIRE FOR CARS

Where the going is hardest, this tire will pull you through while other tires slip and clog. It is built for the cars that travel over "no-man's land"—for it has been tried and proven on gumbo roads and in deep snow.

This tire has maximum grip, both ways—going ahead, and backing up—plus greatest resistance to side slipping.

2 NEW TIRES BY GOODYEAR TO HELP YOU PULL THROUGH QUICKLY WITHOUT CHAINS**THE GOODYEAR LUG TIRE FOR TRUCKS**

It bites into soft going with a caterpillar action. Then—as it revolves—it cleans itself of mud, snow, etc., automatically.

It gives you maximum traction both forward and backward.

The tread is designed so that there is always a smooth surface on the road—for easy, quiet riding.

If you have trucks that frequently need excess road grip, see the Goodyear Lug Tire now.

WORLD HAPPENINGS BRIEFLY TOLD

Arthur Gray, blind newspaper seller, of Birmingham, is studying for the Alabama bar examination.

A state visit by King Edward to Scotland following the coronation next May is under consideration, it has been learned.

Pursuant to its policy of non-intervention in Spain's civil war, the Free State government has banned the export of arms to Spain.

The appointment of Surgeon-Commander Henry Ellis Yeo White as honorary surgeon to the king has been announced.

Exports of cheese from Canada during July increased nearly \$1,000,000 over the same month a year ago, according to figures issued by the Dominion bureau of statistics.

Sir Percy Vincent, lord mayor of London, told a luncheon audience at Victoria, if he were 20 years younger and could borrow a few pounds he would come to the Dominion to live.

Jewish tourists who park their automobiles in Poertschach, Austria, and then go for a swim return to find the leather tops of the cars have been cut through in the form of a swastika.

Hardy Bent, who shined the shoes of the late King Edward VII, when he visited Toronto as the Prince of Wales, died at Digby, N.S. He was 80 and had been a bootblack for 60 years.

The London News Chronicle said 60 Galla chieftains of western Ethiopia had appealed to Great Britain to accept a mandate over more than 50,000 square miles in that section of the country.

The United States navy transport Vega brought to Seattle the season's "take" of Pribilof Island sealskins, valued at \$1,750,000, which will be discharged and divided among the governments of the United States, Great Britain and Japan.

Coal Burned Underground

Russia Trying Out New Idea For Heating Purposes

To save the cost of transporting coal from mine to consumer, the scheme of burning it underground and piping the resulting coal gas hundreds of miles to cities has often been proposed. Now word comes from Russia that the idea has been put into practice, on an experimental scale. After tunnelling through a subterranean coal vein near Lissichansk, engineers deliberately set the vein afire, capped the shafts, and installed a piping system to collect the gas. Soon the burning coal pocket became a giant underground retort yielding quantities of gas. The first samples proved of low heating value, but as the underground fire grew in intensity the quality of gas rapidly improved.—Popular Science.

Sorry He Spoke

A beautiful young woman entered the outer office and asked if the manager was disengaged.

"Well, he's rather busy," replied the secretary, doing his best to be complimentary, "but he's always pleased to see pretty girls like you."

"Is that so?" replied the visitor, in a voice which would make a refrigerator feel like a furnace in comparison. "Will you please tell him his wife wants to see him?"

Spend Day To Film Eagle In Flight

Scenes In "The Great Barrier" Are Going To Be Genuine

Two members of the Gaumont British unit, engaged in making "The Great Barrier", Canadian railway building drama, in the heart of the mountains of British Columbia and Alberta spent one whole day to secure a small "shot" for the picture—an eagle in flight.

Sepp Algeier, internationally famed photographer, and Rudolf Aemmer, guide and mountain climber by profession, set out on an expedition to obtain the desired film and were doubly successful in that they "caught" two flying eagles in one "take" as well as one bird in another length of negative. The views were secured in the rough country near the Kootenay Central line South of Golden, B.C., and naturally these specialists were elated with results although the assignment meant a long tramp through thick forests and an arduous climb before reaching a likely roost where they laid in wait for six hours before the eagles obligingly appeared above them. To take this picture, too, they had to pack heavy camera equipment as well as ordinary supplies.

The film of the flying eagle could have been faked by the use of a stuffed dummy but "The Great Barrier" is not being made that way—the Gaumont British unit travelled 6,000 miles from London to make the picture in the actual locales of the pioneer construction feat of more than 50 years ago. Incidentally, the eagle "bit" is to be used in the sequence in which Major Hell's Bells Rogers, portrayed by Farrell Macdonald, decides to follow the flight of a bird in order to find a route for the railway through the mountains. This actual happening brought the name of "Eagle Pass" to the approach when the C.P.R. was being built back in the '80's.

Believes In Control

Jack Miner Not In Favor Of Protecting Hawks, Owls And Other Vermin

1. Jack Miner does not believe in protecting hawks, owls and other vermin that steal chickens, while humanity is imprisoned for the same act.

2. Jack Miner does not believe in protecting song and insectivorous bird life 365 days a year, and then imprison, fine or punish a child for committing the same act once a year.

3. Jack Miner does not believe in protecting hawks, owls, weasels, etc., that live on pheasants, partridge and quail 365 days in the year, while sportsmen are fined, prosecuted or imprisoned for violating the game laws once a year.

4. Jack Miner does not believe in any State or Federal Government liberating upland game birds, at thousands of dollars expense, and protecting hawks, owls and other vermin that eat them up alive.

5. Jack Miner never uses the word "exterminate." He believes in control, whether it be animal, plant, insect or bird life, or even humanity; and he feels he has a right to his own opinion, as much as any individual who thinks the animal, insect or bird kingdom should rule. If a man wants a hawk or owl sanctuary, or a weed garden, Jack Miner does not kick; but that is all he will ever have, because the place will be robbed of the more valuable things of life. Yet, if a person is raising chickens or other poultry, or if a person has a sanctuary where small song and insectivorous birds nest, or if he has a garden, the man must control and destroy the weeds and the undesirable.

Making It Clear

The parish council of a small German town had to draw up a regulation making it incumbent on owners of dogs to put them on a lead when out walking. The first draft read as follows:

"He who owns a dog and is seen running about the streets without a lead will be shot."

"That can't be right," said a member of the council; "it sounds as if the owner was to be shot."

So the regulation was redrafted, and now runs thus: "He who owns a dog and is seen running about the streets without a lead will be shot—the dog."

Science Scores Again

Finds Simple Solution To Puzzle Over Heat-Resisting Brick

A simple solution to the 30-year puzzle of the strange, destructive behavior of refractory, or heat-resisting, brick when made from certain types of flinty clay found in Ohio and adjoining States, has been discovered by Prof. J. O. Everhart, member of the research staff at Ohio State University's engineering experiment station.

For three decades or more research workers and manufacturers have had an almost continual headache over the mysterious, and costly, actions of the brick during its manufacture from this clay and have pondered solutions as to why.

Blast furnace operators have placed a brick floor in the bottom of the stack, later to discover the brick floating on top of the mass of molten metal.

Incinerators have been put out of commission because brick popped out of the sides almost as rapidly as they were put to use.

Brick made in the top of the kiln were as much as one-eighth inch longer than those at the bottom, although they were all intended to be the same size.

Everhart's solution to these problems is merely to grind the clay into finer particles. This short solution to such a weighty problem is important to concerns in Ohio and other states which use millions of dollars worth of this kind of brick each year, as well as to the manufacturers. Eighty per cent. of fire-clay products have as their major constituent this flinty clay, found in the coal regions.

Civilization Has It

Superstition Not Confined To People Of Primitive Lands

There are as many primitive superstitions among the skyscrapers of New York and the farmhouses of Iowa, as there are in the jungles of Africa or the inner fastnesses of Tibet, according to Claudia de Lys, who has been around the world three times tracing superstitions to their origin. She has travelled through strange places on all the continents, but she says civilized countries have as many as the others.

"I have lived in an African village where tiny bells tinkled on the tree-tops to keep off malevolent spirits," Miss de Lys says. "I have visited tribes where men were forbidden to dance with women. Yet these things are no more strange than what I have found in the United States, where there are horseshoes above doors, where the wishbones of chickens are pulled apart, where football teams have mascots, where people are burned in effigy and loads of hay are wished on."

The Milky Way is formed by the combined light of many stars which are too far away to be seen individually.

Simple Crochet--And You're All "Set"

Household Arts by Alice Brooks

Bag and Beret Point Up Any Ensemble

PATTERN 5681

Add a bit of dash to your wardrobe by treating yourself to this flattering beret and bag—so smart in yarn! You'll crochet the simple puff-stitch of its "raised" design in no time at all—stiffen the beret edge with wire—and be "all set" for Autumn fun. In pattern 5681 you will find instructions for making the set shown; an illustration of it, and of all the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg. There is no Alice Brooks pattern book published.

Famous Estate

250-Year-Old Wallington House To Be Bequeathed To Nation

Sir Charles Trevelyan, lord lieutenant of the board of education in the two Labor governments, intends to bequeath 250-year-old Wallington house and estate in Northumberland, comprising around 13,000 acres, to the national trust so it may be "secure from disruption and dispersion."

"Most of you know pretty well by now," said Sir Charles to a garden party gathering of tenants, "that I do not believe in private ownership of land. By pure chance I own Wallington. I regard myself solely as a trustee for the community, and I have been putting back into the estate during the seven years I have been here, all and more than I have ever drawn from it in rents.

"Great houses like this and the great estates round them are part of an order of society which is passing away. Taxation, both income tax and death duties, make their continuance practically impossible. I doubt if any successor to me inheriting Wallington could himself afford to live here, and certainly his successor could not do so without selling most of the estate."

There are valuable collections of china and pictures, and a library compiled by Macaulay and Sir George Otto Trevelyan. In it Sir George Otto Trevelyan wrote his famous "History of the American Revolution," and Pauline Lady Trevelyan held a Victorian "Salon." Algernon Swinburne read his poems on the lawn. Millais painted. Augustus Hare saw ghosts. Ruskin talked and wrote. The house also contains the writing desk at which Lord Macaulay wrote his "History of England."

Want Something Different

British Women Tired Of Housework Talks Over Radio

Women listeners have persuaded the British Broadcasting Corporation that they want less talk about pots and pans and more about travel and women's work outside the home. There are to be fewer talks on the English radio in future "aimed at women only."

"In a not far distant future the idea of talks for women only will appear as eccentric as the notion of talks for men only," remarks the News Chronicle. "The fact is that the steadily growing majority of intelligent women are interested in exactly the same subjects as most men; for the excellent reason that they happen to live in the same world and to be as intimately concerned as ever men are in politics, in religion, in the arts and sport."

Losing Tons In Grinding

Capt. Clyde S. McDowell, U.S.N., supervising engineer, estimated the 201-inch eye for the world's largest telescope, to be installed on Palomar Mountain, will lose four tons in grinding at California Institute of Technology, Pasadena.

Not Primitive Affair

Life On Australian Sheep Station Is Very Pleasant

Life on a sheep station in Australia is far from the primitive affair generally imagined by people on the other side of the world from "down under," according to Mrs. Hedley Hardman, whose late husband owned two such stations in the New England district of New South Wales. Mrs. Hardman was a recent visitor in Montreal.

The workers have comfortable cottages and pretty gardens, and there is usually provision for community recreation, such as tennis courts, Mrs. Hardman told a reporter.

Merino sheep were raised on her husband's sheep stations, the "population" being two to an acre. One of the stations was a freehold of 23,000 acres, the other comprised 4,500 acres. The sheep are shorn by electrically-operated shears, the work being done under contract.

Social life among the owners of the sheep stations is most enjoyable, she said. They generally spend a month to six weeks at the stations, for quail-shooting and polo. The Hardman town house was in Sydney.

Mrs. Hardman has travelled to many parts of the world, but she finds Canada one of the most interesting countries she has visited, and was enthusiastic about the variety of the scenery on her route from Vancouver.

A Rare Water-Plant

Grows Only In Australia And Feeds On Insects

Somewhere in a Queensland swamp there is a small rare water-plant which feeds on insects.

To find a specimen of this plant, *Utriculata tubulata*, is the ambition of Professor F. E. Lloyd, Emeritus Professor of Botany at McGill University, Montreal. He has arrived in Australia for the purpose. The plant is perhaps the rarest of the 475 known plants which feed on flesh.

Since it was discovered in 1875 by the botanist Armitt not a single specimen of it has been found in any other part of the world. It feeds on minute insects which it entraps with its waving tendrils.

Professor Lloyd has already travelled in the Dutch East Indies, China and Central America in search of rare botanical specimens. He is ready to spend at least a year in Australia on his latest quest.

An Authenticated Record

List Of Accidents Proves There Is Something In A Name

The following was written by Neal O'Hara, in the New York Post: There's something in a name, after all—Hugh Williams, for instance. Here's an authenticated record: On December 5, 1663, the British ship *Menai* founded in the English Channel. The only man to escape was Hugh Williams. In 1785, a schooner crashed into the Isle of Man. Only one man was saved and his name was Hugh Williams. On August 5, 1820, a pleasure boat sank in the Thames, near London. A passenger named Hugh Williams escaped. And on August 19, 1889, seven men were drowned when a ship from Leeds sank. Two men (an uncle and nephew) were saved. Each was named Hugh Williams.

A dining-room needs a good light for carving. We prefer a knife.

Royal Yeast Cakes and Royal Sponge Recipes make perfect breads like these . . .

Use Royal Yeast Cakes and you'll be sure of perfect leavening. That's because each cake comes individually protected by its own air-tight wrapper. No other dry yeast has such protection. Britain Going Ahead

In spite of the reduction in parcel post rates, Britain's postal services had a profit of £11,250,000 in the last year. Telephone service, operated by the British post office, had a record income. It is another sign of the way Britain is going ahead.

Gold Production

Production of gold from Saskatchewan and Manitoba sources during June was recorded at 16,076 ounces while the total for the first six months of 1936 was 87,841 ounces as compared to 78,507 ounces in the same period of last year.

The New York Times and the Boston Transcript are the only two daily newspapers in the United States that do not publish comic strips.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER IV.—Continued

"Yes, you do sound as if you might be the very girl I'm looking for. . . ." And then he went on amazingly: "I've been hunting this town over, turning everything upside down, wishing that Fate would send me a girl such as you seem to be. A lovely girl who has been places and seen things, who could take her place anywhere, and probably has, even if she wouldn't want it known—a girl without family ties or other encumbrances, you understand?" His smile twinkled at her a little crookedly. "Beginning to get a little of the why of the cross examination?" And—a girl with sufficient disregard for the conventions to allow herself to be molded into the type I want her to represent. A reckless, heartless, fast-living playgirl!" Again the twisted smile. "I was beginning to believe such a girl could exist only in fiction, but—"

Starr caught her breath sharply, looking at him as though searching for the Mephistophelian physical attributes his words intimated might be expected to be discovered. What madness was this? For a fleeting moment Starr feared that the curse of Tut-Amen-Ra, mercifully forgotten for a few pitiful moments, was attacking her mind instead of her body. This couldn't be real.

Probably she was still back in the Museum; still under the spell of a painted priestess. She was uncertain whether this whole episode of the cafe of painted women and licentious-looking men—and the man whose very appearance represented to her all she had lost, all she might never hope to gasp—was a fantastic creation of her own imagination.

"Hassan," she had deliberately called him in her own mind, stubbornly putting away the idea that of all the people in the world she had ever seen he least resembled anything or anybody Egyptian or Arab. In that peculiar mood where she had determined to embrace, instead of cringe, from the things Egyptian which had lured her father to his death, she had decided on this name for the man as symbolic for this, her own Arabian Night's tale. It couldn't be anything else. . . .

Illy she wondered what his name might really be. That didn't matter, either, in this tumultuously foolish dream.

She stole a glance at "Hassan's" strong profile, felt the warm pressure of his hand sending tingles of fire through her cold blood. Oh, no, he was real enough! No Arabian Night's Hassan. Probably somebody called Reggie by his friends, or on the other hand, Bill.

He went on rapidly, as though making the most casual conversation:

"I'll provide you with an apartment, of course, the kind of setting you should have. As a matter of fact" he paused a moment, studying her. "Gad! What an idea! With those eyes, that coloring—all this talk we've been having about Egypt—you're not Egyptian, of course, but what an idea! You could be it, and—" He stared at her, as if he didn't see her at all, but as if she were some puppet of his imagination he was trying to set into its own little jig-saw puzzle place. "You could forget you'd ever been—"

Starr didn't know why, but she found herself nodding, taking part in the game whatever it was, as she said dreamily:

"Forget—forget" It was a half-hypnotic, mechanical reply. How much she wanted to forget! "The Arabs have a saying: 'In the desert one forgets everything, one remembers nothing any more'. . . I was in the desert once. . . ."

The man stared at her a moment, half hypnotized himself.

"What an actress!" he murmured, then the half contemptuous grin came back and he went on in the same cold-blooded business tones:

"I'll furnish the setting, yes. I'll introduce you to the right people. I'll make you shine like a diamond. If you fall in with me you won't have a thing in the world to do but play to your heart's content."

WILSON'S

FLY PADS

REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

10 CENTS PER PACKET

WHY PAY MORE?

THE WILSON FLY PAD CO., Hamilton, Ont.

So that was it, was it? She might have known. "If you fall in with me—" The same old proposition any girl in the world would have recognized, even as unsophisticated a girl as Starr Ellison whose eyes, it appeared, were world-wise—and were not. Even she could recognize that old thing for what it was. The same old thing merely dressed up in new words!

Starr had thought that there was no room in her tired heart for more emotion. But another worm of bitterness ate in, creeping along, lingering, making itself at home.

Yet in spite of it she found herself considering the offer. This was not the same thing she had been up against at the employment agency. It was quite another matter. No lascivious old beast who wanted to employ you in the guise of secretary, who wanted you to "be nice to him." This man—he represented so much of all she had looked upon from afar. He was her own kind. He represented—glamour.

Her hitherto well catalogued thoughts on one subject whirled in a vortex, spun to a centre. Other girls—Girls did sell themselves for less than six months of life. Every day. They thought nothing of it. Why not she, who had so little to lose, so much to gain? This stranger, this New York Arabian Night's "Hassan" who had materialized merely at a tumultuous wish, was offering her everything she wanted—desperately—except true love, of course. And that she dared, not accept from any man, even though it should be offered.

Her voice was brittle as her head lifted with the imperiousness of one of those ancient princesses she resembled.

"And the price?"

"Hassan" sounded suddenly shocked. As quickly he moved a bit away from her.

"Oh, you mustn't misunderstand me." He glanced quickly at her, then away, but in one quick glance, decided not to make the bald statement he had intended. He put it in a mild way. "I—er—I assure you I'll not attempt to inflict myself upon you in any—er—unpleasant way. It's a business proposition—merely. You will be on a salary. You see, it will work out like this: All the time you are playing, as you say you want to play, you will actually be working for me!"

"Leltak sa'ida, effendim," said Starr softly.

"Have it your own way," said the man, carelessly. "I salute you, too, and you can take it or leave it."

Starr wanted to study him, did not dare. But catching a slanting glimpse of his eyes, she was instantly ashamed of her suspicions. Whatever this man was, this "Hassan" of Broadway, he wasn't that kind!

He wasn't the kind who picked up girls on the street or accosted them in cafes merely because they were alone. He didn't have to. He had that indefinable charm which is irresistible to the opposite sex. Hadn't she felt it herself when they were dancing all the time before and after? Starr made a mental guess that her "Hassan" had kept many a debutante sitting by her telephone, drumming her polished finger nails, waiting for his call.

He was waving away the waiter who hovered obnoxiously near. His eyes were on Starr. There seemed to be a flash of doubt in them, for all he had said.

"I've got a lot more to say to you," he said. "There's plenty to be explained. How about us getting out of here—my place isn't far away—we can have a bite of supper there, and—and well, there plenty to talk about. . . ." He was rising. "Let's go."

Starr did not answer, for there was no answer. She was conscious only of the soft clatter of clinking glasses in the place, the muted clamor of traffic outside, the unreality of everything as she picked up her purse, shivering a little, feeling much in a daze as she felt him take her arm and guide her toward the door as though she had no will of her own.

She made only one remark when he settled her in the taxi. She said:

"I'm afraid I won't be a very good companion tonight. I had a grouch when you drifted by. I—I feel just like breaking things."

"Don't let me interfere with any of your childish pleasures," he said, and laughed, cheerfully. "Anything your little heart desires. I've even got a lot of ex-Christmas presents at home you can try your hand on. And the pleasure will be all mine."

BACK-ACHE

When terrible, down-dragging back pain, painful and swollen joints, or spell after spell of dizziness and headache makes you feel like this—look out for your kidneys! Inflamed, congested kidneys cannot properly filter your blood. Correct this condition before serious rheumatic trouble develops. Soothe and strengthen your kidneys with

GIN PILLS FOR THE KIDNEYS

Little Helps For This Week

A soft answer turneth away wrath, but grievous words stir up anger. Proverbs 15:1.

Renew Thine image, Lord in me; Lovely and gentle may I be; No charms but these to Thee are dear; No anger mayest Thou ever find, No pride in my unruffled mind, But faith and heaven-born peace be there.

Neither say or do aught displeasing to thy neighbor; and if thou hast been wanting in charity, seek his forgiveness or speak to him with gentleness. Injuries hurt not more in the receiving than in the remembrance. A small injury shall go as it comes, a great injury may dine or sup with you. Why should you vex yourself because another has vexed you? Grief for things past that cannot be remedied, and care for things to come that cannot be prevented, may easily hurt and can never benefit you. Therefore commit yourself to God in both, and enjoy the present.

Man Without A Country

Former Russian Leader May Be Forced To Leave Norway

Indications are that Leon Trotzky, former Russian revolutionary leader, might soon be returned to his usual status of a man without a country.

The wandering, sickly Bolshevik is to be expelled from Norway. Government sources said, if charges of new international intrigue are proved against him. At the same time, Pravda, Moscow Communist organ, made clear that there would never be hope for reconciliation between Trotzky and Stalin.

Banished from his own revolutionary land and excluded from many others, Trotzky accepted refuge in Norway with the promise to refrain from propaganda or other international activity. Recently young Norwegian Nazis broke into Trotzky's home at Honefoss and found papers which they said dealt with plots in France and Spain. They handed them over to police.

Trotzky entered Norway June 18, 1935.

Modern Magic

Aladdin's magic with a lamp is being approached by modern industrial engineers, who have invented a light which continues to shine after it has been extinguished. Introduced during a homefurnishings exposition in the Merchandise Mart at Chicago, the light has a chemically treated shade which continues to glow for several hours after the electric bulb is turned off.

While the outside temperature stood at 103 degrees, a drinking fountain in the post office at Findlay, Ohio, froze. Postmaster W. T. Ault said the mechanism had gone "haywire."

According to a trade journal there is a distinct boom in new cars. And usually a distinct rattle in old ones.

W.C.T.U. Officers.

The following officers were elected at the annual meeting of the W.C.T.U.:

President, Mrs. Allan Gole
Succeeding Mrs. H. M. Reiber who had been president for the past 18 years

1st Vice Pres., Mrs. Hallman Rec-Sec., Miss Z. Cressman Treas., Mrs. J. V. Bersch Cor-Sec., Mrs. Boettger Supt of Y Girls, Mrs Cunningham Pianist, Mrs Chamberlin

WEEKLY SERMONETTE

"Before you reprimand another, be sure that you are not deserving of censure in that which you attempt to correct. If you cleanse a blot with stained fingers—you make a greater blot."

LOCAL & GENERAL

Mr. W. Bellamy, of Salmon Arm, B.C., is renewing acquaintances in the district this week.

Fred Reiffenstein, who took his examination as auto mechanic recently, has received his certificate of proficiency.

Mrs. Edith Swanson and son and daughter, of Spokane, were visiting in the district last week and attending to business interests.

Mr. and Mrs. Harry Pearson drove to Calgary on Saturday and spent the weekend visiting Mr. and Mrs. Parker Reed.

St. Cyprian's W.A. will hold a Tea & Sale of Homecooking at "The Bookeraage" on Saturday, September 26.

Mr. Norman McLeod and family have moved into the house in East Didsbury lately vacated by the Lowrie family.

The young people of the M.B.C. Church will give a "Fanny Crosby" program at the Community Hall on Sunday, Sept. 27th, at 7:45 p.m. Everybody welcome.

Try a Pair of Men's \$2.50 Work Shoes from T. E. Scott.

Messrs. T. Johnson, J. McGhee, A. Brusso and H. Morgan drove to Calgary on Monday evening to attend a meeting of the Scottish Rite Masons.

Visiting at the J. D. Thomas home are Mrs. M. J. Thomas, of Indus, also Mr. and Mrs. Williams and daughter and Mrs. Leader, of Regina.

Listen in every Sunday evening at 8:30 to the Eddie Cantor program over the Columbia Broadcasting System. Patronize the Texaco Stations.

We Have Men's Good Leather Work Gloves from 40c a pair up.—T. E. Scott.

A. Melvin Anderson, optometrist and sight specialist, will make his regular visit to the Rosebud Hotel on Monday, Sept. 28th. Eyes examined and glasses fitted.

Miss Jessie McCoy entertained about 25 of her young friends at her home on Friday evening. Dancing was enjoyed and her friends all expressed best wishes on her departure to the University.

Mrs. J. H. McFarlane and son, Ed., of Vulcan, are visiting the former's daughter, Mrs. Norman McLeod. Mrs. P. Cummerford, of Leslieville is also visiting the McLeod family.

You Want a Good Windbreaker? T. E. Scott has them from \$1.95 up.

The Didsbury students at the University of Alberta left this week for Edmonton. Messrs. A. Reiber, Roman Holub, Tom Clarke, and Miss Jessie McCoy will join the advanced classes, while Miss Lorna Clarke joins the freshman class.

Mr. C. S. Murphy, of Sergeant's Bluff, Iowa, was in town over weekend looking over his business interests here. He operates a large farm in Iowa and states that the corn crop in his district is a complete failure for the first time in his experience.

The barn dance and raffle held at home of Mr. and Mrs. Wm. Dainty, Westcott, Friday evening last was greatly enjoyed by all. The lucky draw (No. 25) was won by Mrs. H. Steckley. Owing to threshing being in progress the crowd was not as large as expected. Another dance will be held at the same barn on Wednesday, October 7th. Proceeds for a good cause, which will be announced at the dance. Admission: 25c. Ladies please bring lunch.

Try a Suit of \$1.50 Underclothes from T. E. Scott.

Knox United Church Notes.

The pastor will have charge of the services next Sunday at all three appointments at the usual hours. He will continue the sermon theme on the "Function and Value of the Christian Church," dealing with certain objections and criticisms that are often raised against the Church. A most cordial invitation is extended to all.

Tennis Notes.

The Didsbury Tennis Club were hosts to the Olds club in a series of friendly matches Wednesday last. Nine one set matches were played, of which the visitors were successful in six.

The following were the results of the matches:

Mrs. Fife and W. Hood won from Laura Buhr and Tom Royds, 6-4.

Mrs. Bulmer and E. Hodson won from Mrs. Boorman and A. Brusso, 6-2.

Mrs. Sandilands and Mrs. Reiber won from Betty Boorman and Evelyn McGhee, 6-3.

Heath and Maybank won from Cameron and Kirk, 6-4.

Becker and Wilson won from Brusso and Foote, 6-4.

Fife and Bulmer won from Buhr and McGhee, 6-3.

Cameron and Kirk won from Hodson and Hood, 6-2.

Betty Boorman and B. Eubank won from Mrs. Reiber and Becker, 6-5.

Royds and Brusso won from Maybank and Heath, 6-3.

Y. Girls Elect Officers.

The annual meeting of the Y.W.C.T.U. was held at the home of Miss Cressman on Tuesday, Sept. 15th. The following officers were elected:

President, Clara Burkholder
Vice-pres., Florence Chamberlin
Secretary, Mary Newton
Treasurer, Alice Rennie
Cor.-Secretary, Mildred Deadrick
Pianist, Edna Thaler

A social evening followed the business meeting and a delightful lunch was served by the hostess.

SOCIAL CREDIT NOTES

The Didsbury Social Credit Group No. 1 held a special meeting on September 22nd.

Correspondence was read and important business was discussed, after which lunch was served by the ladies. The next meeting will be held at the home of Mr. and Mrs. Andrew Peck on September 28th.

Mrs. A. Schwesinger, Sec.-Treas.

The Didsbury Pioneer S.C. Group held its last meeting at the home of Otto Klein last Monday evening, September 21st. The President's remarks were in the form of a review of the Social Credit work since the Prosperity Bonds were first issued and put into circulation, until the present date. Also attention was drawn to the tactics of the Social Credit opposition. The speaker pointed out that Social Credit was making satisfactory progress in spite of the opposition's greatest efforts in blocking and defeating the movement. The next meeting will be held at Mrs. Ada Stevens' home next Monday, September 28th, 8 p.m. All are welcome.

H. ERB, Secretary.

PUBLIC NOTICE

NOTICE is hereby given to the public that the original Didsbury Social Credit Study Group No. 1 which was organized in August, 1934, was dissolved on December 2nd, 1935, by a unanimous motion of the Group, and consequently it has not existed as a Group since that date.

The present Didsbury Social Credit Group No. 1 has been organized since that date and has no relationship to the original No. 1 Group whatever. Their repeated claim of being the original No. 1 Group is a fraudulent claim.

Signed by the ex-President of the original Didsbury Social Credit Study Group No. 1, which was organized in August, 1934.

HENRY ERB, ex-President.

WEEKLY JOKE

A colored preacher down in Louisiana gave his version of this story with a modern ending, thus: There was a traveller coming along a lonely road and he was set upon by thieves. He was robbed of his money, his clothes taken from him and he was beaten up and left for dead. After he had lain there for some time, along came a good samaritan, who took pity on him, dressed his wounds, put him on his mule and took him to an inn, where he ordered food and clothing for the man, and had the bill charged to himself. "And this am a true story, for the inn am standing there yet, and in the door of the inn am standing the inn keeper waiting for the good samaritan to come back and pay the bill."
